

Pair your Echo speaker with a Bluetooth-enabled device.

To use your Echo device as a Bluetooth speaker for your smartphone, tablet or other Bluetooth-enabled device, follow the below steps.

1. Ensure your device is in range of your Echo speaker.
2. Disconnect any existing Bluetooth connections with the command, “Alexa, disconnect.”
3. Set your smartphone, tablet or other device to Bluetooth pairing mode.
4. Set your Echo device to pairing mode with the command, “Alexa, pair.” She’ll confirm with, “Searching...”
5. On your phone, tablet or other device, select your Echo speaker under Bluetooth settings. Alexa will announce the successful connection.
6. Having configured the connection, you can reinitiate it any time the devices are in range, with Bluetooth, active by issuing the command, “Alexa, pair with [Device Name]” or “Alexa, connect to [Device Name].”
